BALASORE

## BRIEF HISTORY

The state Odisha is one of the cyclone prone states in the country which is vulnerable to destructive impacts of cyclones and tidal wave action of Bay of Bengal. The flood and cyclone in coastal Orissa are the regular features. **Balasore** is one of the coastal District of Odisha lies on the northern most part of the state having 21<sup>00</sup>3' to 21<sup>05</sup>9' North latitude & 86<sup>02</sup>0' to 87<sup>0</sup> 29' East longitude. It is bounded by Bay of Bengal in the East, Mayurbhanj District in the West, Midnapur(West Begal) District in North and Bhadrak District in South. Balasore surrounds an area of 3634 km<sup>2</sup>. Balasore has the unique distinction of being the most thickly populated District of Odisha with the density of population being 524 per sq km which is above the national average of 326. Surrounded by azoring sea beach on the East, deep dense forest in the West, saturated by perennial rivers, enriched by greatest poets, literatures of Odisha through ages, embracing the ITR on its beach and dozens of places of tourist attraction, it has virtually become a veritable Pandora's box. Balasore being the coastal district of Odisha is crisscrossed with perennial and estuarine rivers because of its proximity to sea. It has a massive coast line of 130 km. This District of Balasore has given ways to the rivers such as Subarnarekha, Budhabalanga, Jalaka, Sono, Gangahar and Kansabansa from west to east before surging into Bay of Bengal. The rivers Subarnarekha, Budhabalanga, Sono, Kansabansa, Jalaka & Gangahar coupled with high density population considered as boon for the people , becomes a bane during rainy season making the whole of the District nature's laboratory for experimenting the impact of calamities.

The District is always prone to frequent cyclone, storm and concurrent flood hazards causing considerable loss of life and property of the vicinity. The Geographic location and physical environment of Balasore District coast make it vulnerable to frequent cyclonic disturbances. The high wind speed together with torrential rain and storm surges associates with cyclonic disturbances bring damages to the coastal settlements. Erosion of coastal bank is a regular phenomenon during high tide compounded with cyclone in the Bay of Bengal .

**Balasore Irrigation Division, Balasore** comprises of **three** numbers of Sub-Divisions and **twelve** numbers sections as detailed below.

**(A) Balasore Irrigation Sub-Division, Balasore**

1. Balasore Section
2. Nilgiri Section
3. Basta Section
4. Jamkunda Section

**(B) Jaleswar Irrigation Sub-Division, Jaleswar**

1. Jaleswar Section-I
2. Jaleswar Section-II
3. Bhograi Section
4. Ranakotha Section

**(C) Basudevpur Sub-Division, Basudevpur**

1. Basudevpur Section
2. Soro Section
3. Krushnapur Section
4. Kaithakola Section

This Division is mainly looking after the flood control works with maintenance of flood protective embankments to save the life and property of the vicinity from the occurrence of flood and cyclone. Details of Embankments are given below.

Sl.No.	Type of Embankment	Length in K.M.	Remarks
1	Capital Embankments	30.00	
2	Other Agriculture Embankments(O.A.E.)	57.50	
3	Test Relief Embankments(T.R.E.)	235.45	
4	Saline Embankments	200.55	
	TOTAL	523.50	

Besides the above, Orissa Coast Canal is coming under the jurisdiction of this Division which enters Odisha at Nasarabad in Bhograi block of Balasore District at RD 89.60km and ends in river Matei at RD 212.20km( Total length 114.60km).
