# **ANNUAL REPORT 2016**

DESIGNS DIVISION-I  
LOWER INDRA IRRIGATION PROJECT  
KHARIAR

## FORWARD

It is a matter of great pleasure & Satisfaction for me that the “**Annual Report-2016**” could be brought out for the first time for the year 2015-16. The important features which find place in the report are primarily based on designs of canal structures.

The Computer section of Designs Division requires new computer and printer as the existing computers are old and need frequent repair for which design work is hampering. Regular seminar, technical papers, discussion, training workshop and field visit should be carried instead of mostly concentrating on the routine design work.. The technical staff requires regular training for a better exposure and a positive atmosphere for design oriented activities.

EXECUTIVE ENGINEER
